

Electronic Technology

Career Program at Danville Area Community College
Financial Aid eligible degree program

This two-year degree program is designed to give the training needed for the installation, maintenance, operation and servicing of electronic systems in industry. This is an occupational program typically not designed to transfer. However, this program has been articulated to some senior institutions. Please contact a counselor for specific details.

Graduates of this program will be knowledgeable in the operation, installation, and repair of programmable logic controllers or PLC's. Students are expected to access PC programs, locate faults/malfunctions, and repair equipment or reprogram as required. Electronic repairers install, test, repair and calibrate equipment to ensure it functions properly. They examine work orders, talk to equipment operators, and check for common causes of trouble. They may use voltmeters, ohmmeters, signal generators, ammeters, and oscilloscopes, and run diagnostic programs to determine malfunctions.

Program Specific Courses Include:

- Electronic Circuits
- Digital Electronics
- Opto-Electronics
- Siemens PLCS
- Pneumatics & Controls
- Intro to Electricity/ Electronics
- PC Applications in Electronics
- Programmable Controllers
- Industrial Automation
- Advanced Automation Techniques
