

# Landscape Design/Construction

Career Program at Danville Area Community College

The Landscape Design/Construction program gives the student the technical and practical knowledge needed to design and install landscape plant materials. Graduates also will be able to build patios, install decks, erect fences and landscape walls. Grass establishment, fertilization, irrigation, aerification, and thatch control are also covered. Students will also have a six month internship program starting in April and ending in October. This program is an occupational program typically not designed to transfer, however, this program has been articulated to some senior institutions. Please contact a counselor for specific details.

## Program Specific Courses Include:

- Landscape Principles
- Intro to Horticulture Science
- Landscape Construction
- Tree/Shrub Maintenance
- Conversational Spanish
- Garden Center Management
